Agency profile

Our 15th birthday was day of joy. We are one of the oldest agencies in Slovenian market, with reputation that is being built on few but important competitive advantages, that have formed over past 15 years.

We are skilled in marketing and corporate communication as many others, but we do it with love and devotion. Our main competitive advantages are reliability, deep understanding of the working process of our clients and fast response to their needs.

We are enough enough small to be quick and enough big to be successful. We are not afraid of changes and problems which occur. We take them as a reality of life. Special bonds with our clients are looked after not only in working hours but 24 hours per day, all year long, because we just love this business!
